

SMARTARREDA

# The future is furniture

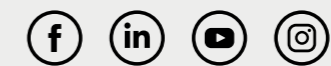

Design-made educational and work furniture

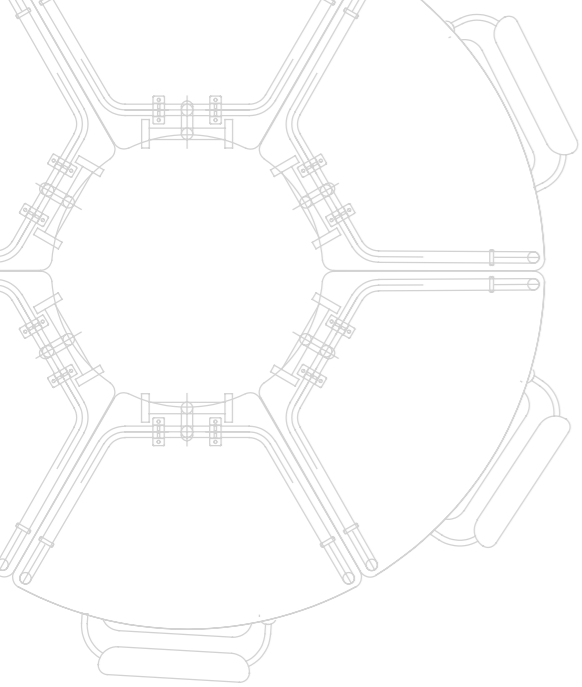

Where innovation meets design

[smartarreda.com](http://smartarreda.com)

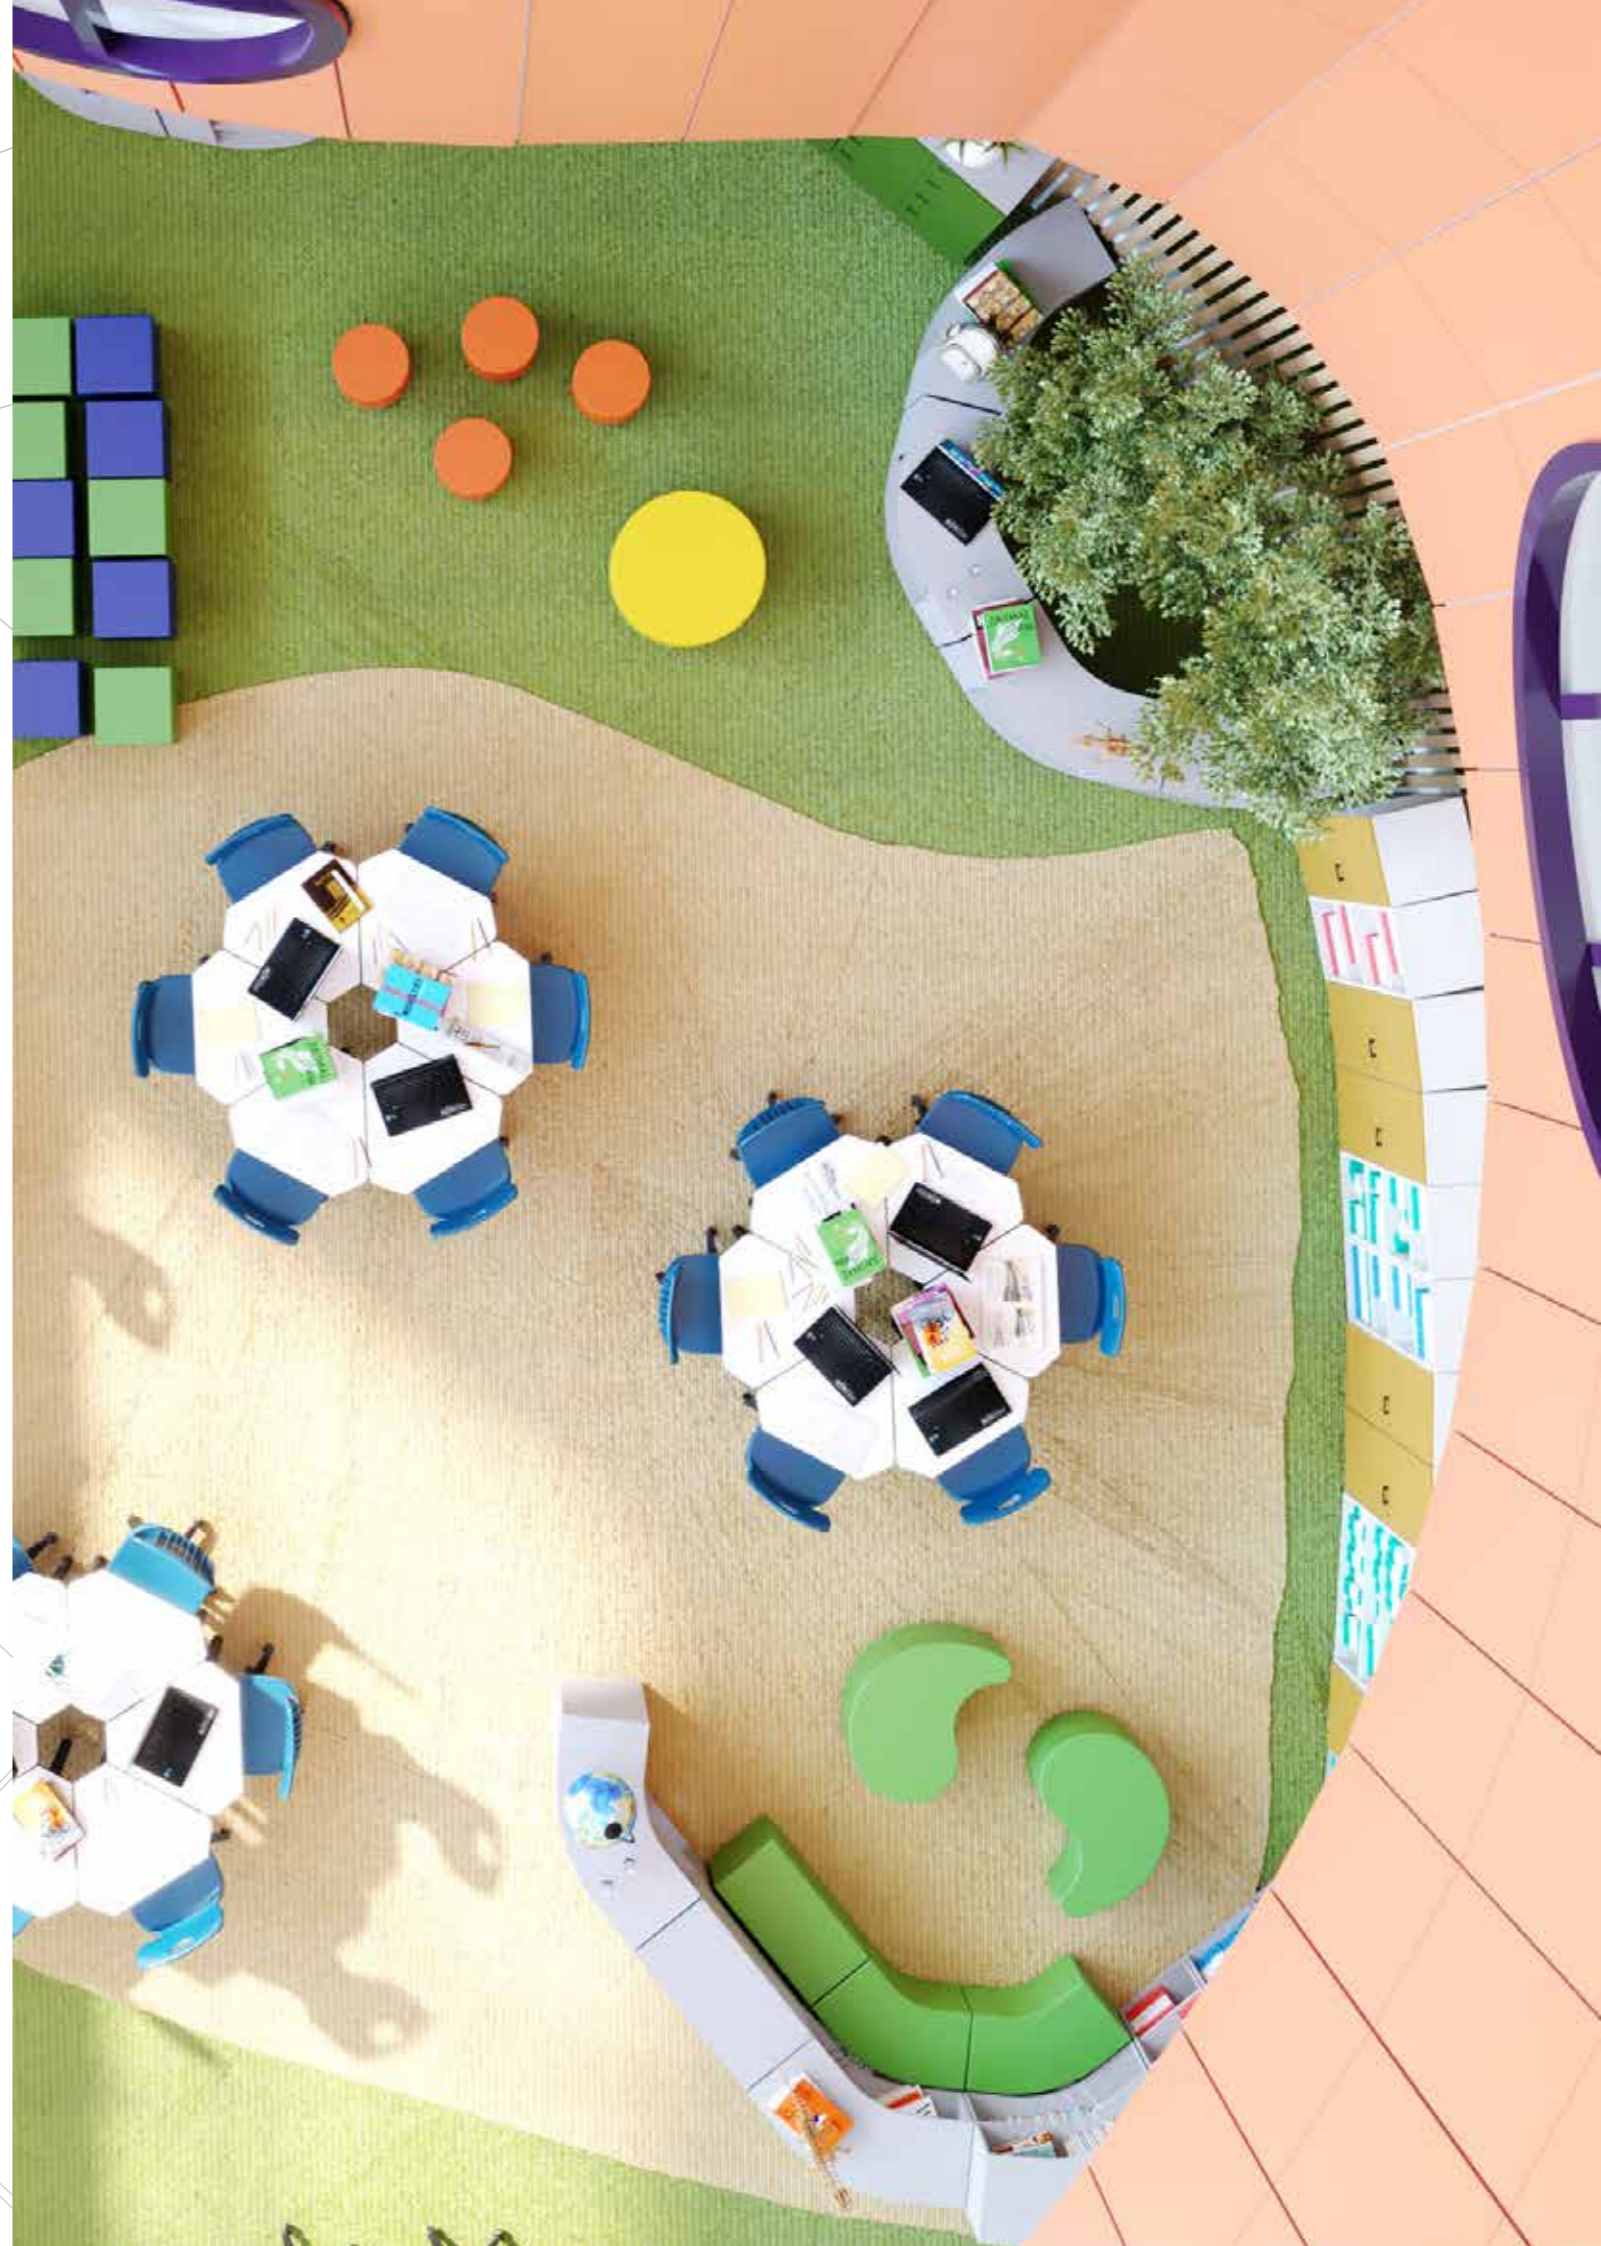

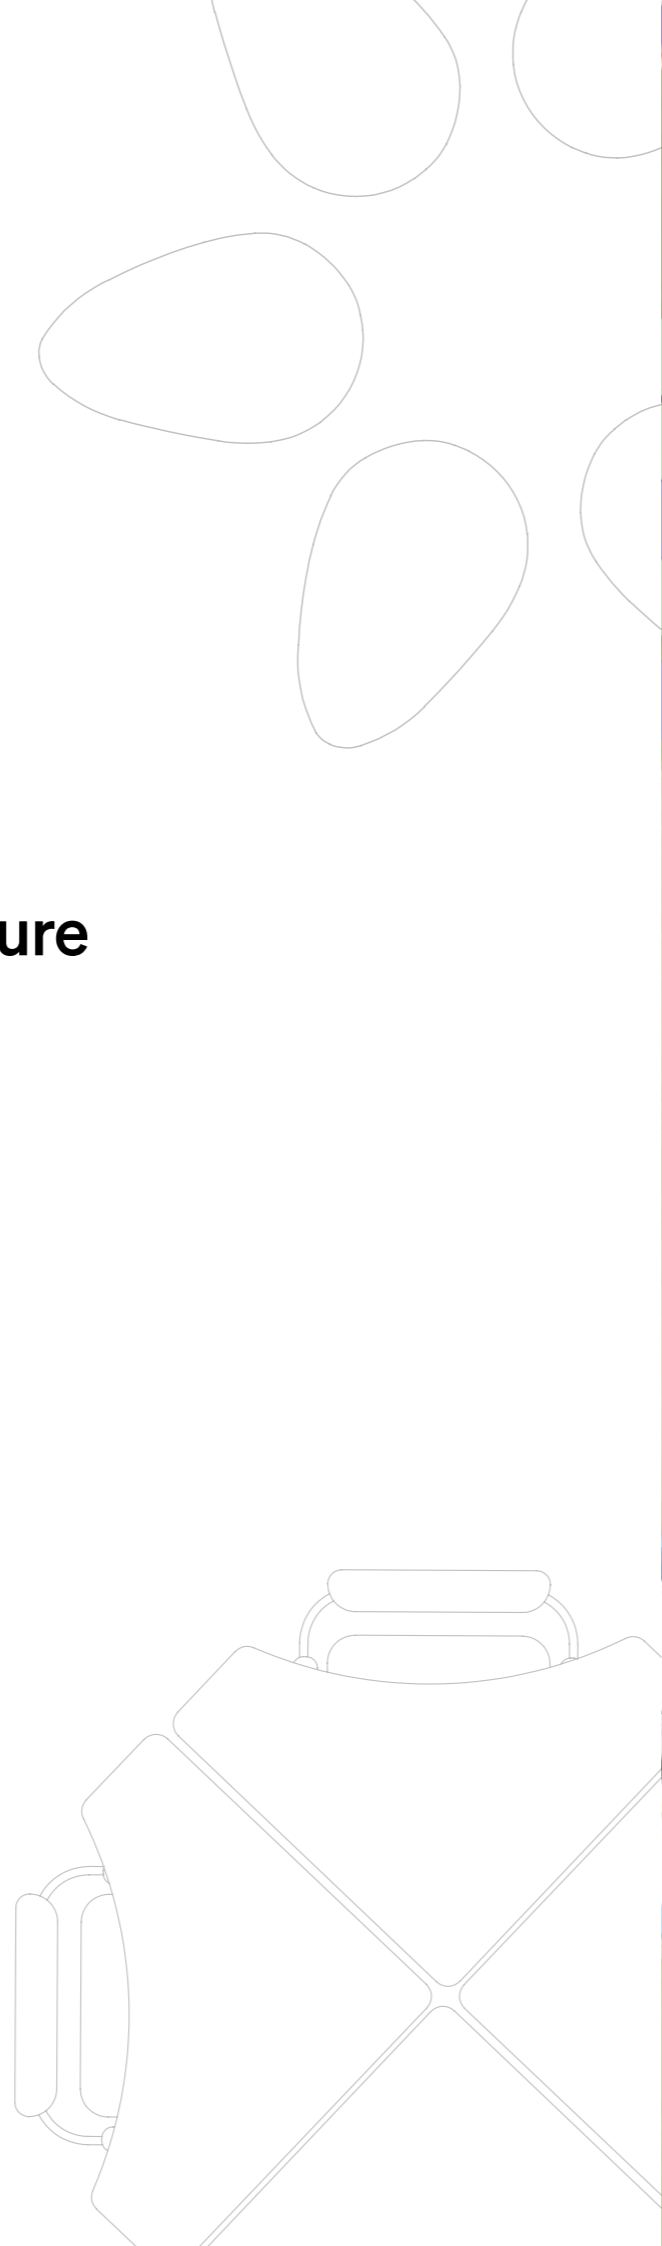

**SMARTARREDA**

## We design spaces that inspire the future

We create educational spaces conceived and designed to promote and facilitate the sharing of knowledge, research, reflection and collaboration. Our furnishing solutions, mobile and modular, are conceived and created to alternate traditional frontal teaching with the «flipped lesson», group work and paired research where students become active subjects of their own education and the teacher takes on the role of moderator and facilitator of learning.

# Welcome to Smartarreda

Born from the experience of Wacebo Europe Srl in the educational market, we are active in the B2B schoolplace sector with services of Consultancy & Design (organizational consultancy, space planning, school place change management) up to the creation and implementation of Innovative Learning Environments. Technology evolves, in parallel, even educational methodologies are adapting to the change. **The new teaching methodologies therefore require dynamic environments, spaces capable of modifying their setting based on the different educational moments.**

## Index

### COLLABORATIVE FURNISHINGS

Technological furnishings	10
Chairs and stools	22
Study and sharing tables	36
Cupboards and bookcases	68
Library Bookshelf System	88
Lockers	98

## Multifunctional table

# Smart design, freedom of movement, maximum productivity

Designed for dynamic school environments, this multifunctional table combines solidity, style and maximum practicality. The metal frame guarantees resistance and durability, while the wooden top available in white, sage green, garnet red and air force blue - adds a touch of color and personality to spaces. Thanks to the wheels with locking system, it is easy to move and reconfigure based on activities, making it ideal for classrooms, laboratories, libraries and flexible environments. The modern and clean design helps create an orderly and stimulating environment, promoting concentration and productivity.

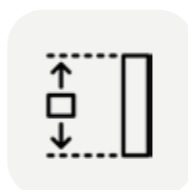

## One table, infinite possibilities, design the space that grows with your ideas

Our multifunctional table was created to adapt to every educational and creative need. Sold in a solid and essential basic configuration, it is designed to evolve over time thanks to a complete range of optional accessories that amplify its functionality and personality.

4 colors available

working top at h. 72 or 100 cm

## One top, two heights maximum versatility

The structure is intelligently designed to adapt to different teaching and operational needs: the top can be mounted at 72 cm for traditional use or at 100 cm for standing or dynamic activities, always guaranteeing ergonomics and comfort.

Eye-catching design

Collaborative learning

## The base is just the beginning, add what you need

You can start with the standard table and add only what you need, when you need it. Do you want greater mobility? The wheels with brakes offer agile and safe movements. Do you need to organize materials and tools? You can integrate the tool holder wall with back, the lower back or the upper back, to improve space management. The upper cap adds an aesthetic and functional touch, while the sheet metal sides, right and left, complete the structure, giving solidity and continuity to the design. And for those who want a distinctive and natural element, a designer flowerpot is also available: a detail that brings a touch of greenery and well-being.

Multifunctional table with metal frame and wooden tops, configurable in two heights (72 cm or 100 cm). Ideal for educational environments and laboratories

# Library Bookshelf System

The key word is versatility! With the new library bookcase systems you can furnish large multifunctional spaces, cultural centers, reading centers and much more. The versatility come from the modularity of these benches that are combined with cushions to provide comfortable seating in storage spaces. Self-supporting in 8/10 mm thick sheet metal of first choice DC01-UNI EN 10130 press-bent. The components of the structure have 2 mm rounded external edges in compliance with current safety standards. The shelves are structural and have a capacity of up to 50 kg (uniformly distributed load).

Standard dimensional and safety certifications for educational institutions:  
- CAM (minimum environmental criteria)

## innovation and reliability

The innovation of materials makes our bookcases **precious furnishing elements**

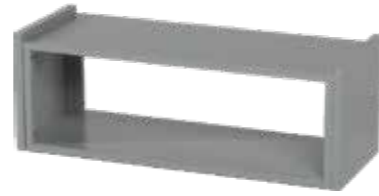

## Design and modularity

All modules have a width of 120 and a height of your choice of 45,82,120,160 and 200 cm, **combine them to create your perfect solution**, together with the bench module with coloured padded cushion!

# Design your space

Lock it safe, leave with confidence

Our lockers are designed to offer you maximum security and peace of mind. Thanks to durable materials and advanced locking systems, you can store your personal items without worries. Trust us for safe and convenient storage, wherever you are.

## Smart, simple, secure

Store documents  
and personal  
effects

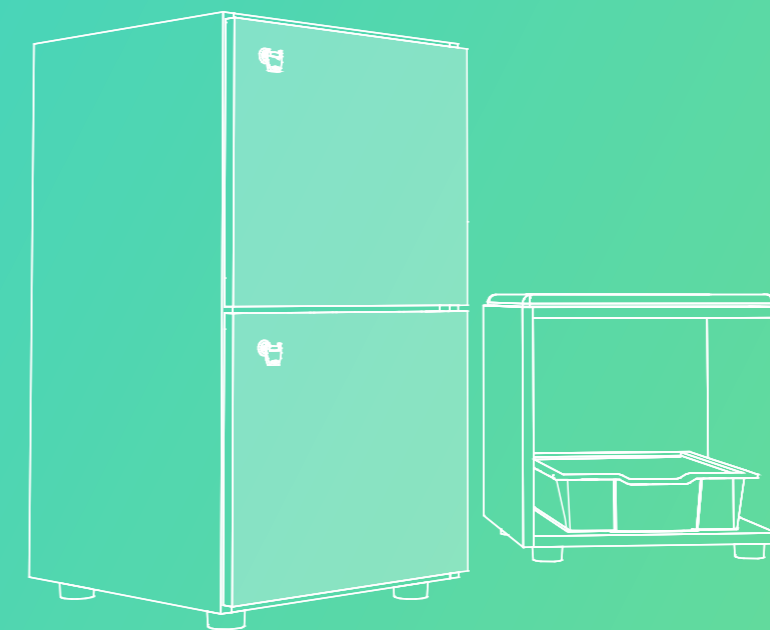

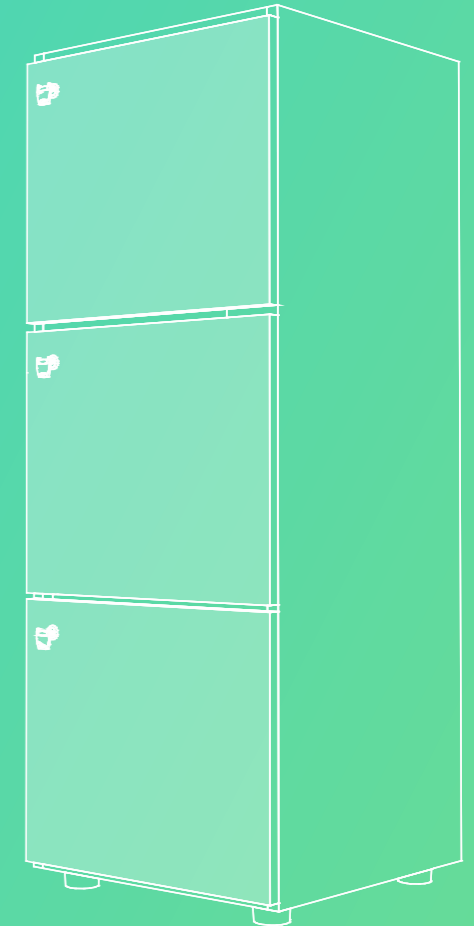

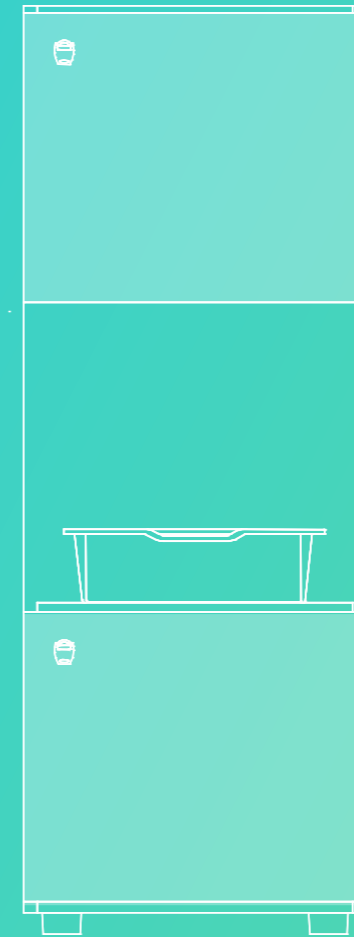

Combining elegance and practicality in a collection of lockers with a modern and essential design. Standard locks and different types of heights, same level of security and efficiency.

### Overview

All components are supplied disassembled and packaged in a triple folding cardboard wrapping, with perimeter protection strips and for fillings. The corners are protected, where necessary, with shock-absorbent corner guards. The packaging is closed with adhesive tape and heat-sealed nylon strapping.

SMARTARREDA

# Sound-absorbing panels

Panels with light lines and a design that combines lightness with elegance. Designed for maximum sound absorption performance and the main feature of "separating" without dividing. The ability of these panels consists in creating divisions capable of forming functional spaces, adapting to every space requirement.

Standard dimensional and safety certifications for educational institutions:

- CAM (minimum environmental criteria)

Decree 23 June 2022

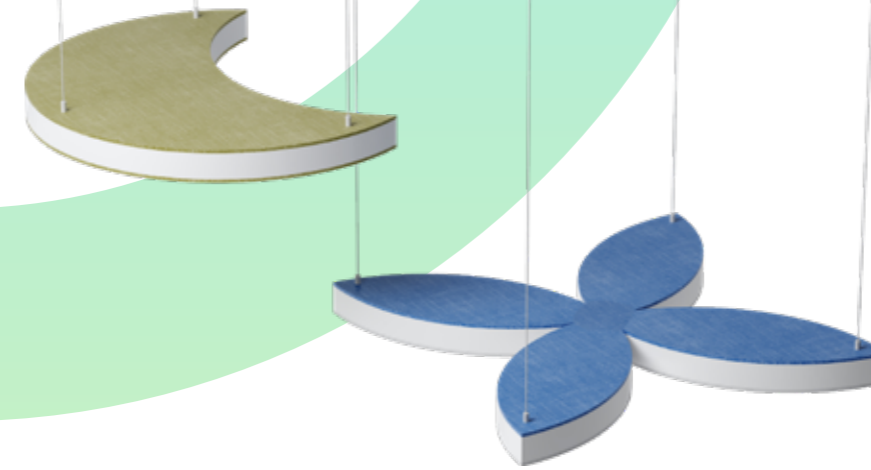

Ministry of Ecological Transition

# Reduce noise, increase harmony

## Acoustic wellbeing in every color

Choose from a wide range of alternatives, geometric shapes and bright or neutral colors: each panel is an opportunity to design quieter, more beautiful and more welcoming environments. It combines aesthetics and acoustic well-being in a single solution with a strong visual impact. **Our panels are available in white fiber or covered in fabric on one side or both sides.**

## Acoustic panels

# Acoustic performance, decorative soul

Our acoustic panels represent the perfect synthesis between design and functionality. Made in different shapes and colors, they adapt elegantly to any environment, transforming walls and ceilings into decorative elements capable of improving sound comfort. Thanks to their extreme versatility, they can be installed on the wall for an integrated and refined effect, or suspended from the ceiling horizontally or vertically, becoming architectural elements that define the space and reduce reverberation. Ideal for offices, meeting rooms, schools, restaurants and domestic environments, the panels give character to the environments while significantly improving the quality of listening and studying in the classroom.

Vertical ceiling suspension kit

## Perfect acoustics, total flexibility

Our sound-absorbing panels on wheels are designed to meet the needs of modern schools. Available in different sizes and heights, they offer a versatile solution to dynamically organize spaces, creating quieter and more functional environments. Thanks to their mobile structure, they can be easily moved to adapt to laboratories, temporary classrooms, group activities or moments of individual concentration. The sound-absorbing material significantly reduces reverberation and noise, improving the quality of teaching and learning. Practicality, design and acoustic well-being: all in one panel.
